

Your Phone System in the Cloud

Combine Your Phone System and Phone Service in the Cloud

Jive Voice is a cloud-based PBX phone system that combines traditional PBX hardware and service into a single hosted solution. It offers all of the advanced features of an enterprise PBX system with over 80 Hosted VoIP features.

CUSTOM SCHEDULES

Custom schedules come standard with Jive Voice, allowing users to configure time-based call routing for open/closed business hours, holidays, and special events.

VISUAL DIAL PLAN EDITOR

Make real-time changes to dial plans and call routing with Jive's Dial Plan Editor. Map out call flows visually using the drag-and-drop interface. Easily configure elements like wait times, auto attendants, voicemail boxes, sound clips, and schedules.

DETAILED CALL ANALYTICS

Create opportunities for more efficient use of resources, better training, and proper scheduling by using Jive's mean/minimum/maximum and time-of-day reports, geography-based heat maps, and downloadable call detail logs.

No upgrade charges or service fees are necessary to enjoy Jive's world-class service.

Visit jive.com/voice to learn more.

Jive Mobile

Jive's softphone application lets users access Jive features and take business calls on their mobile device.

Jive Desktop

Provides instant messaging, integrations with CRM services and directories, and click-to-call capabilities.

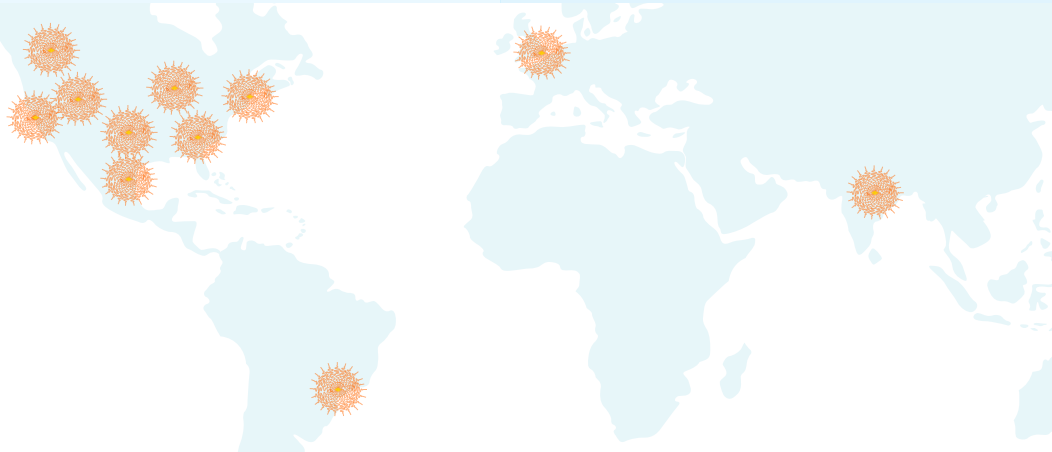

Jive Web

Jive's online portal allows users to customize call flows and make real-time changes via a web browser.

JIVE CLOUD

Jive's service delivery platform runs through datacenters in the following locations:

- Atlanta
- Chicago
- Dallas
- London
